## Dear Hunter

### Logistics & Taxidermy Greenland birds

When you have spent thousands of dollars (or euros) on a spectacular hunt for small game in Greenland, we strongly recommend you choose the safe route for your trophies from Greenland to your home. The extra cost for doing everything correctly and ‘by the book’ is relatively small compared to the overall cost of your hunt.

It’s often a big risk to take the frozen trophy in your luggage. The risk to get caught in the customs is high and confiscation is often a likely outcome. Just imagine how devastating that scenario would be...

### Use the worlds most experienced taxidermy company when it comes to hunting trophies from Greenland.

First Class Trophy is probably the most experienced taxidermy company in the world when it comes to logistics for taxidermy from Greenland. Due to many years of experience and processing of more than 2.000 trophies hunted in Greenland, we know all the small details which makes us able to ensure your trophy gets the best and safest ‘journey’ all the way from Greenland to your home if you live in an EU country or to your in-coming broker if you live outside EU, eg. USA, Canada, Norway, Switzerland, Australia, etc.

### ALL INCLUSIVE

The following pages will help you familiarise yourself with the whole process of ‘After the shot’ with detailed information and calculations regarding the costs ALL INCLUSIVE without any ‘ugly’ surprises.

### *Probably the best taxidermy team in Europe...*

Our taxidermists have won the titles ‘BEST IN WORLD’ and ‘BEST IN EUROPE’ multiple times. As Europe’s largest taxidermy company, we leverage our extensive buying power to source the finest materials on the market.

This allows us to efficiently produce high-quality taxidermy mounts and provide you with the best value for money for your investment.

We promise you a beautiful trophy mount that you will enjoy for many years.

### At your service

Wynand Louw

Operation manager

*First Class Trophy Taxidermy*

# LAND MAMMALS IN GREENLAND

Polar bears, musk oxen, caribou, arctic foxes, hares, lemmings and the rare Arctic wolf are all part of the terrestrial fauna of Greenland.

Arctic wolves are found only in the most northern areas and lemmings are located in Northeastern Greenland, in a small rural zone between the ice sheet and sea ice pack with almost no vegetation. Most of the other animals live more wide spread across the country.

The Greenland Muskox originates from North-East Greenland, North of Scoresby Sound. In the sixties they were introduced to the mid-west inland area around Kangerlussaq and have multiplied and spread to the northern parts of West Greenland. During the eighties, animals were moved to South Greenland, where they have prospered, due to very good environmental conditions. All along the west coast, as well as large parts of the south coast, there are herds of reindeer. Each year they migrate between the interior and the coast in search of food and to reach summer calving grounds near the ice cap.

The interface between land and sea is the home of the polar bear. This Greenlandic white coated bear is especially

common in Northern and Eastern Greenland, where it hunts from the sea ice, and in Southern Greenland, when it comes ashore after drifting on the sea ice from the East Coast. The Greenland polar bear hunts seals and birds and often during summer will go on shore to consume vegetation. The bears usually do not hibernate during winter.

## GREENLAND BIRDS

The hen-like ptarmigan changes color between summer and winter and is always camouflaged well regardless of the season. Yet it can never be sure of fast-moving threats from above, especially the white-tailed eagle and the Greenland falcons, who are formidable hunters.

The birds in Greenland are as varied as their names are unique. From small buntings, siskin and sparrows to guillemots, puffins, auks, guillemots, terns, kittiwakes, gulls, ravens, owls and many other known species, they each have their own areas of the country which is home to them.

As the list goes on, we would like to mention the great northern diver, the fulmar, the cormorant, the goose, the eider duck, the merganser, the sandpiper, sand runs, Turnstone and the Arctic skua among many others. The ingenuity used in naming the different species matches their unique diversity.

# AFTER THE SHOT

## LOGISTICS & TAXIDERMISTRY PROCESS

### *Step-by-step...*

#### First Steps

#### Getting the trophy to First Class Trophy Taxidermy

- The hunting guide tags the trophy with the hunter's name and reference number. The hunter and the hunting guide fill out the order form manually, which is then signed by the hunter.
- The hunting guide, outfitter or booking agent emails the order form to: office@firstclasstrophy.com
- First Class Trophy creates the order in the ERP system. The hunter gets a login to First Class Trophy's Order and Production web based portal, where the hunter can "Track & Trace" the order progress, logistic and production stages.
- **The hunter pays 50% deposit of the total order.**
- The trophy and export paperwork will be delivered to Royal Artic Line (RAL) for shipping from Greenland to Denmark. The trophy arrives in Denmark and First Class Trophy will, in partnership with RAL, take care of all import procedures, customs clearance and veterinary inspections into Denmark. The trophy will be transported to First Class Trophy's workshop for taxidermy work.

We normally receive the trophies from your outfitter 1-2 months after the hunting season ends. For summer hunts, we usually receive the trophies in October/November/December and for winter hunts in June/July (often the fjords/sea is frozen in Greenland until June). The trophies will be shipped as frozen trophies and will be kept frozen until they reach our taxidermy workshop.

#### Following Steps

#### Taxidermy work

- The taxidermy work will start. The hunter will be updated with progress by email notification and can also log-in to check order status at any time.
- 2 weeks before the taxidermy work is finished, the 50% balance must be paid (the hunter will be notified in this regard by FirstClass Trophy)

If the hunter only want's "Dip & Pack" work we normally finish the work within 6-8 months. If the hunter wants First Class Trophy to do the mounting, we finish the work within 7-9 months.

#### Final Steps

#### Getting the trophies back home to the hunter

- When First Class Trophy has received the balance payment, the packing and crating will take place
- The hunter must confirm the delivery address and thereafter the trophy will be shipped to the hunter's address if the hunter lives in an EU country or to a preferred incoming broker if the hunter lives outside EU (USA, CANADA, NORWAY, SWITZERLAND etc.)
- The receiver (hunter or incoming broker) will be notified regarding the delivery date

**Processing time:** We use 6-8 months for "Dip & Pack" work and 7-9 months for mounted trophies.

**NB:** Winter hunting trophies (hunted in February-March) are normally received at our workshop for processing in June/July (often the fjords/sea is frozen in Greenland until June). For summer or autumn hunting (August/September/October) trophies are received for processing in October/November/December

**NB:** Work commences when we have received the trophies and the deposit has been paid.

### "Track & Trace" all logistic and taxidermy process on our web portal

- When you receive the order confirmation from First Class Trophy, you will also get an username and password for our on-line production portal "Track & Trace". When you log-in at the portal, you will be able to follow the individual stages with your trophy all the way from we receive the trophy from Greenland, through the entire taxidermy work and packing/crating progress until the trophy is ready to ship to you.

# AFTER THE SHOT

1

## Skinning and tagging of your trophy

Your outfitter will take care of your trophy in Greenland and prepare it according to your preferences. Please make sure that all parts of the trophy are tagged correct and carefully so we can identify it when we receive it.

**Important:** Write your name and the trophy number reference on the trophy tags with a water resistant permanent marker.

2

## Shipment of your trophy from Greenland to Aarhus in Denmark

Your outfitter or hunting agency will arrange shipping of your trophy from Greenland to Aarhus in Denmark. The cost for this service must be paid by the hunter directly to your outfitter or hunting agency.

3

## Receiving the trophy in Aarhus, Denmark

First Class Trophy will take care of your trophy when it arrives in Aarhus, Denmark.

First Class Trophy will take care of the following:

- Handling and customs clearance
- VAT (customs clearance)
- CVED documentation
- Veterinary control or certificate
- Terminal costs
- Frost container rental during the entire import process
- Designated sealed frost transport to First Class Trophy taxidermy workshop
- Handling and unpacking, checking and tagging of trophies
- Frost storage of the trophies for later processing

The price per bird or small mammal is 60 EURO for a minimum 10 birds or mammals at the same time. If less than 10, the price will be adjusted.

# Taxidermy work

## Taxidermy work

When the trophy arrives at our taxidermy workshop, we will immediately take care and secure that your trophy gets the correct treatment. First Class Trophy is Europe's largest taxidermy company. We have considerable experience with trophies from Greenland and can assure you of the very best quality and service.

*We offer 'Dip & Pack' or Mounting of your trophies*

### 'Dip & Pack'

If the hunter prefers another taxidermist other than First Class Trophy, he or she can choose to have the trophy prepared as 'Dip & Pack' for export to their preferred taxidermist.

#### **PLEASE NOTE - VERY IMPORTANT**

**FOR MAMMALS:** Please note that we recommend our extended 'Dip & Pack' service includes wet tanning of the skin (dried for export). We tan the skin rather than only salting for a number of reasons:

- 1** We have our own tannery, which means that we tan the skin with full control over the process. This ensures that the hunter receives a skin that is quality checked before mounting. Therefore, there is no risk that the hunter will receive a skin that is not suitable for mounting. If there is any problem with the skin (hair loss or any other quality problem) we will discover the problem during the tanning process and can act to solve it and eventually source another skin for the hunter.
- 2** The hunter saves money. Our price for a tanned skin is less than most other taxidermist will charge just for salting of the skin.
- 3** The hunter saves MORE money. The fact that the skin is already tanned means it can be used directly for mounting by the hunter's taxidermist without costs other than the final trimming of the nose, ears and lips and soaking the skin in a liquid to make the skin flexible and stretchable again. So the hunter should get a discount on the mounting price from his or her local taxidermist compared with the normal mounting price where the hunter delivers the salted skin to his or her taxidermist. In the export box with the trophies, there is a document with information for your taxidermist regarding which liquid solution to use for the soaking.

#### **PLEASE NOTE - VERY IMPORTANT**

**BIRDS:** Drawing on our extensive experience with birds from Greenland, we strongly recommend that First Class Trophy handle the mounting of birds for you. As we cannot tan the bird skin for later mounting, the 'Dip & Pack' method for birds poses significant risks, as they often become challenging/impossible to mount from salted skin. Also, using the 'Dip & Pack' option may lead to import problems, even with professional freight forwarders. Choosing 'Dip & Pack' for birds is solely at the client's risk.

# MOUNTING

As Europe's largest taxidermy company we can promise you that we will create a beautiful trophy mount for you. We create many trophy mounts from Greenland's wildlife and assure you a trophy mount in the best quality with attention down to the smallest detail. Please see our references from hunters all over the world, on our website.

Please see from page 11 to 13 for inspiration and examples  
Please see our mounting prices on page 14

## 5

### Packing and crating of 'Dip & Pack' or mounted trophy

When we have finished our work with your trophy, we will build strong crates for transporting it to you. Our crates are built with approved material for export and meet all relevant international regulations. We will carefully pack your trophy into the crate so it arrives safely.

#### Shipping

We will ship your trophy to the agreed address by either road transport or airfreight. If you live in an EU country, we ship the trophy all the way to your doorstep. If you live in a country outside the EU, we ship to the preferred incoming broker in your country. Please see our shipping prices on separate sheet.

*Please note. There are savings on packing, crating and shipping if we ship 2 or more trophies to one (1) address. See page 15 for more information.*

#### Insurance

Please note that your trophy is insured all the way from Greenland until you have received it at the destination address. The insurance covers trophy fee, service in Aarhus, taxidermy work, costs for packing and crating and transport costs. This insurance cost is included in the price. The insured amount is 2 000 EURO. If the hunter wants additional coverage it can be offered at 1% of the insured amount.

# Mounting Options

## Birds

There are many ways to mount birds. The most important things to choose between is:

- Closed wings
- Open wings (flying, with wings down/wings up, taking-off, landing,)
- Open mouth / closed mouth
- Single bird mount / group bird mount
- Habitat base: A. Driftwood - B. Wood plate/stone - C. Rock
- Habitat decoration (snow, ice, marine life, etc.)

Explore the various mounting options available for Greenlandic birds on the following pages. Let the graphic examples serve as a visual guide to aid your decision-making process. Each of the 12 unique options is assigned a number and distinct code (highlighted in red text) – simply use this number and code in your order form. This is the best way to eliminate any misunderstanding.

Should you have a specific vision in mind, we welcome special requests. Share a reference photo with us, and we'll gladly craft a customized mount tailored to your preferences. Because, as the saying goes: a photo says more than a thousand words... Additional cost might be applied to special requests.

# Client CERTIFICATE

## Our clients receive a certificate "Insect-proofed Taxidermy Mount"

When you receive the finished taxidermy mount from First Class Trophy Taxidermy, you will receive an official signed certificate as your confirmation that the mount(s) have been treated with the full 3-Step Mount Medix insect-protection.

**AUTHORIZED TAXIDERMIST & DEALER**

Insect-proof taxidermy mounts, lifetime protection and maintenance solution.

# CERTIFICATE

## Insect-proofed Taxidermy Mount

**1 Year Guarantee**

Your trophy mount, produced by First Class Trophy Taxidermy is so effectively treated against insect attack, that we give you 1 years guarantee that no damage from insect attack will happen to your trophy mount. And that's counts for all kind of trophy mounts: mammals, birds, reptiles and amphibians. If, unexpectedly, damage from insect infestation should occur within 1 years from the delivery date of the mount, the warranty will cover a repair damage or if a repair is not possible, a full refund of the amount paid for the taxidermy work.

**With our professional Mount Medix Mount treatment, you will receive an insect-proofed taxidermy mount**

During the production of your taxidermy mounts, we use the well-proven Mount Medix technology that ensures that we deliver an insect-free taxidermy mount to you. The treatment is a combination of several processes and products following the guidelines from the world's leading specialists in cleaning solutions, insect protection and maintenance in the taxidermy industry. Read more at [www.mountmedix.eu](http://www.mountmedix.eu)

**Furthermore, your taxidermy mount can be effectively protected against insect-related damage throughout its lifetime.**

In addition to the treatment that your taxidermy mount undergoes in the production process, we also offer our customers a Mount Medix maintenance program where you can maintain your taxidermy mount in perfect condition with and "easy-to-do" annual (or semi-annual) treatment and prevent insect or bug attack throughout its lifetime.

-----

**Mount Medix LLC** is a company founded in the USA to provide high-quality natural products to the taxidermy industry.

**Created by scientists and professional taxidermists – laboratory tested with documented effect**

The Mount Medix product line was created by leading natural product development scientists in conjunction with professional taxidermists to accommodate the needs of the taxidermy industry. The philosophy behind the Mount Medix concept is as simple as it is ingenious: Protecting the taxidermy mount against insect attacks through cleaning solutions & eliminating the mount as a food source for insects and their larvae. These products have been thoroughly tested in the laboratory and have been professionally and privately used to protect and treat insect infestation in taxidermy mounts and trophy rooms in the USA for more than 10 years.

**Made from high-quality natural products - no pesticide licence needed**

The entire Mount Medix product program can be purchased and applied without a pesticide licence. The products are easy to use and leave behind a pleasant odour.

-----

**It is hereby confirmed that the taxidermy mount(s):**
