2024 Single Guns

Skane - South Sweden

Sweden is one of the best destinations for high volume Geese shooting. What makes Sweden unique is the species of Geese that are available to be hunted and that we don't have any bag limit. Every year we are having days with over 200 Geese. Sweden is one of the few places where Barnacle Geese can be hunted in Europe! They are not resident Geese, they are real migrant Canada's. Other species of Geese which can be hunted are Greylags and Greater White Fronted which can make for a real mixed bag when it comes to morning lights.

The majority of the hunts are field hunts and take place over harvested fields, winter crops that have been planted and grass fields. Geese will be hunted in the early mornings over decoys on the fields where the hunters will be laying in layblinds or in hides in hedges.
